Concrete

# Concrete

Jean-Marie Massaud's design for Vondom's Milos tables stands out for its innovative use of concrete surfaces.

This material is highly regarded for its durability and versatility. It effectively resists weathering and wear and tear, maintaining its impeccable appearance and functionality over time.

In addition, its ability to create a welcoming and elegant ambience makes Milos tables an ideal choice for both indoors and outdoors.

# Manufacturing

The Milos tables are made of a material composed of 100% cement fibre, which gives them a robust and resistant structure.

This innovative material not only guarantees long durability, but also offers a lightness that facilitates handling and arrangement in different environments.

# Treatment

The concrete surfaces of Milos tables have a specialised exterior treatment. This finish protects the concrete against the effects of weather, ensuring that the tables maintain their integrity and aesthetics over time.

# Cleaning & Care

Our production is governed by the standards of our quality assurance system ISO 9001:2015 and environmental system ISO 14001:2004. And we only use the highest quality materials to guarantee a long product life.

To keep Milos tables in perfect condition, wipe the surface with a cloth dampened in a mild soap solution and dry immediately with a dry cloth.

If left outdoors, it is advisable to protect them with a waterproof cover during the autumn, winter and rainy season. These maintenance instructions ensure that the tables maintain their beauty and functionality, prolonging their service life.
