

# ULM MOON DAYBED

By Ramón Esteve

Designed by Ramón Esteve for Vondom, the main characteristic of the Moon Daybed is its circular shape and the rotating system on which its base rests, which allows the piece to rotate on its own axis.

Articulated through two hemispheres, the base is made of rotational moulded polyethylene with the possibility of LED backlighting thanks to its hollow interior, while the top is made with a polypropylene cord braid, and recently we have incorporated a new cover option: the Sunvision fabrics, a blend of high tenacity polyester PVC-coated and solution dyed acrylic for a textile feel.

This system allows the filtration of air and dims the light that is projected towards the interior, generating a space that invites relaxation and makes Moon an ideal piece for leisure or chill-out environments.
